

Helper Guide

For people helping on one board

A helper fills in one board for the admin. You can't change any other board.

Get set up

- 1 Create a login on Game Town Square.
- 2 Send the admin the email you used. They add you as a helper on their board.
- 3 Sign in and open the board link they send you.

Fill in names

- 1 Tap a square.
- 2 Type the person's name and tap Save name.
- 3 To clear a square, erase the name and tap Save name.

Draw numbers

- Tap a number box across the top or down the side and enter 0 to 9.
- Or leave them blank. Numbers are drawn on their own when the board locks.

Scores

- Tap the menu button (three lines) and choose Scores.
- Type each team's score, or choose Pull from ESPN.
- Typing scores turns ESPN off for that board until you pull from ESPN again.

Lock the board

- Tap the menu button and choose Lock board. Locking draws any blank numbers.
- If you don't lock it, the board locks itself 15 minutes before kickoff.
- After it locks, nothing can change. Only the Board Master can unlock it, or a Commissioner when the Board Master allows it.

What helpers can't do

- Change board details like teams, colors, or points.
- Move or delete the board.
- Touch any other board.
