

Player Guide

For anyone who plays on a board

Game Town Square runs squares boards for games. Boards use points, not money.

Open a board

The person running the board sends you a link. It can open one board, a game day, or a whole week. You don't need a login to look at a board.

Read the board

- The top team runs across the top. The side team runs down the left side.
- Each square has a number from 1 to 100 in the corner and the owner's name.
- When the board locks, the numbers 0 to 9 are drawn across the top and down the side.
- The right column shows the points paid for each quarter and the final.

How a square wins

- 1 At the end of each quarter, take the last digit of each team's score.
- 2 Find the top team's digit across the top and the side team's digit down the side.
- 3 The square where they meet wins that quarter's points.
- 4 Men's college basketball pays Half and Final only.

Get a square

- Ask the person running the board. They put your name in the square.
- The board locks 15 minutes before kickoff. After that, names and numbers can't change.
- Squares nobody took at lock time are marked Plug.

Scores

- Scores update on their own from ESPN during the game. A Live tag shows while the game is on.
- If the score looks behind, tap the menu button (three lines) and choose Update score.

Save or share the board

- 1 Tap the menu button (three lines) next to the board.
- 2 Choose Save image, Share image, or Copy link.
