

Commissioner Guide

For Commissioners

Commissioners run every community and approve new admins. Everything in the Community Admin Guide applies to you too.

What you can do

- Run weeks, game days, and boards in every community.
- Approve or deny admin requests.
- Create new communities.
- Add and remove community admins.
- Change names, numbers, and details on locked boards. The board stays locked.
- Unlock boards when the Board Master turns that on.
- Free Total Access: every plan and add-on is included, like unlimited communities and Playoffs (playoff bracket and bowl pick'em), plus anything added later.

Approve admin requests

- 1 When someone asks to join a community, Admin requests shows at the top of your home screen.
- 2 Each request shows who's asking, which community, and their note.
- 3 Tap Approve or Deny. Approved admins get a message the next time they open the app.

Create a community

- 1 On the home screen, tap New community.
- 2 Enter the name. You're added as its admin.

Manage admins

- 1 Open the community and go to the Admins tab.
- 2 Tap Add admin and enter their login email. They need a login first.
- 3 Tap Remove to take someone off. You can't remove other Commissioners.

Fix a locked board

- Open the board. Tap a square or number box to fix it, the same as an open board.
- To change teams, colors, or points, tap the menu button and choose Edit details.
- The board stays locked the whole time. Players can't change anything.

Unlock a board

- This only works after the Board Master turns on Commissioner unlock.
- Open the board, tap the menu button, and choose Unlock. You'll enter your password again.
- The board shows that you unlocked it.

What you can't do

- Delete communities.
- Delete locked boards.
- Remove other Commissioners.
